

ILAND SECURE CLOUD BACKUP

iland Secure Cloud Backup for Veeam Cloud Connect is designed to help you protect your critical data from internal and external cybersecurity threats, meet your long-term retention requirements, and help you modernize your backup strategy away from older technologies such as physical tape.

The integration of Veeam's backup- and replication-software with iland Secure Cloud Backup offers an easy and cost-effective offsite solution for your backup and archive / LTR needs. Configuration of Secure Cloud Backup can usually be done within minutes (Backup-Policies, User-Rights). iland's solution offers reliable and robust protection against data loss events including malicious or accidental deletions, hardware failures and cybercrime.

With multiple layers of defense including security, cloud backup, and air-gapped Insider Protection, iland Secure Cloud Backup can help customers remove single points of failure to minimize the time and business impact of data loss

iland BaaS:

FEATURES AND DIFFERENTIATORS

- > Protection of your backups from ransomware with Insider Protection
- > Scalable and unlimited storage
- > Cost-efficient consumption-based pricing
- > All inclusive, no additional fees for set-up, bandwidth and operation
- > Easy set-up, especially for existing Veeam users
- > Comprehensive support for onboarding and deployment
- > Complete backup management through unified console
- > VMware based technology
- > DRaaS option available
- > 24/7/365 Premium Support
- > Global availability with 11 DCs worldwide
- > Based on iland's award-winning Secure Cloud Infrastructure with 100% uptime SLAs

Optional

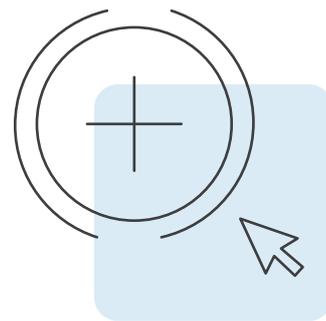

ILAND INSIDER PROTECTION

Insider Protection for iland provides improved protection against internal and external threats like malicious deletion by employees and many types of ransomware. To ensure the protection of your data in case of unauthorized access to the Veeam / iland Secure Cloud Console, deleted files are automatically moved to an air-gapped location that is not visible to the customer. Restore of this data requires personal identification by iland staff. This service is exclusive to select Veeam Cloud Service Providers running Veeam Cloud Connect.

3 2 1 +1
BACK-UP

BENEFITS

- > Lower TCO due to lower backup costs and improved IT resource efficiency
- > Elimination of operating costs associated with older on-prem solutions
- > Improved speed of data recovery through powerful search and restore of files, folders and workloads
- > Simplifies audits and ensures sensitive data meets regulatory demands
- > Extend your primary backup with scalable, flexible and unlimited cloud storage

DESIGNED WITH COMPLIANCE IN MIND

iland pursues a compliance-first approach to data security and protection. A dedicated compliance team, comprehensive reporting and certifications for more than 20 regulatory frameworks (incl. CSA Gold Star) ensure that your compliance requirements can be met. All iland services undergo regular, independent verification of security, privacy and compliance controls, achieving certifications, attestations and audit reports to demonstrate compliance.

iland's compliance team can answer your questions before, during and after your cloud deployment and provide the documentation you need to conduct third-party audits.

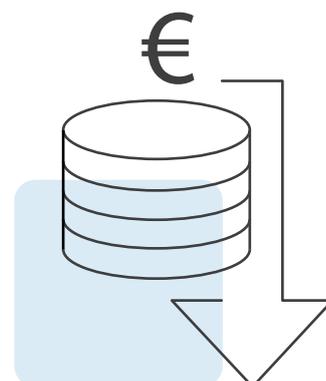

SECURE CLOUD CONSOLE

iland's Secure Cloud Console is an award-winning unified management platform, which provides management, control and visibility across all iland services (incl. public/private clouds, data protection, DRaaS, IaaS, BaaS).

- > Monitoring cloud storage usage, receive utilization alerts. Proactively add and resize resources.
- > Unified management across all applications, services and resources such as compute, storage and networking. Detailed performance, security, compliance and billing information.
- > Management of security features (firewalls, anti-virus, patch-management) and compliance features directly integrated into console.

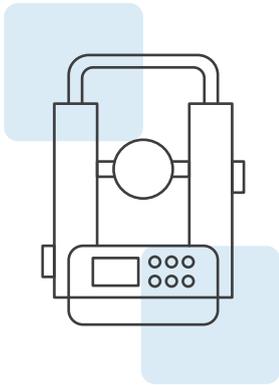

STRAIGHT-FORWARD PRICING

- > Price per TB, regardless of number of VMs
- > Month-to-month or quantity and term-length contracts
- > No set-up fees
- > No bandwidth fees
- > No operation charges such as ingrees and egress
- > 24/7/365 Premium Customer Sport included
- > Bring your own Veeam license or rent from iland directly

CLOUD SIZING, CONNECTIVITY AND COMPATIBILITY

- With iland Catalyst

To ensure optimized performance, accurate provisioning and detailed cost predictions, iland has designed Catalyst. Catalyst allows to quickly take inventory of your global environment through VMware vCentre and thereby simplifying the journey to the cloud with complete strategy and planning visibility.

- > Model your cloud sizing and capacity requirements based on real-time production data. Quickly see how much storage, compute, and memory you will need in the cloud.
- > Leverage a built-in database of real-world usage patterns for accurate modelling of different scenarios.
- > Create custom groups for sizing individual workloads, applications groups, or different production sites.
- > Test your model and network capabilities with any iland cloud location to ensure an optimized experience. Update workload bundles with estimates for data seeding or backup change rates
- > Predict monthly usage costs using different usage scenarios including ad-hoc/disaster events enabling you to model your failover costs.
- > Verify compatibility with existing infrastructure (VMware-versions, hardware components etc.).

ILAND SECURE CLOUD SERVICES

iland is a global cloud service provider of secure and compliant hosting for infrastructure (IaaS), disaster recovery (DRaaS) and backup (BaaS). iland is recognized by industry analysts (Gartner, Forrester) as leader in disaster recovery. The award-winning iland Secure Cloud Console provides unmatched visibility and ease of management for all of iland's cloud services. iland meets the most stringent requirements for security, performance and compliance and provides customers with the scale and flexibility they need.

IN&WORK AG

Your Partner for iland Secure Cloud Services in the DACH-Area

In&work AG is an IT-Company based in Zurich and Managed Service Provider (MSP) of iland Secure Cloud. We have been providing consultancy and engineering services to clients such as MNCs, SMEs and government agencies for more than 20 years. Our main expertise lies in infrastructure/data management and B2B-digitalization.

We enable our clients to realise the full potential of the iland Cloud Services by developing individual IT- and ITSCM-strategies and by optimizing architecture, processes and organisation.
